Incentives for Smarter Health Care

Ping-Pong Plenary
Wennberg International Collaborative

Dr. Stefan Spycher, Vice-Director General FOPH

Short input to start

Some remarks about:

- the incentives in the mandatory health care insurance
- regional variation and policy responses (examples)

Incentives MHCI

- **Regulated Competition** concept behind MHCI 1996
- Strong **state framework** conditions (obligatory, broad basic benefit package aso) + **competition** (between insurers, between providers) + **choice** (insurance models, insurer, provider)
- Key incentives **insured**: premium (height; reduction), deductibles, co-payments
- Key incentives **insurer**: risk compensation, competition (insurance models, cost-management aso)
- Key incentives **outpatient provider**: Fee-for-Service (Standard) vs. Capitation; competition less important (obligation to contract)
- Key incentives **inpatient provider**: DRG-payment, Quality/Specialization

Arthroscopic meniscectomy on the knee

2015

Fälle pro 1000 Einwohner

Kennzahlen

Population	Erwachsene Bevölkerung der Schweiz (>17 Jahre)
Behandlungen (CHOP Codes)	806X10 806X11
Anzahl Regionen	61
Anzahl Interventionen	20896
Standardisierte Rate CH	3.06
Gesamtvariation	20.93
System. Komponente der Variation (SCV)	20.47
Anteil der SCV an der Gesamtvariation	98%
